

Ignacio Martin Diaz

Email: rogerpeke97@gmail.com

Date of birth: 24/03/1996

Country of origin: Argentina

I'm a CS student and a self-taught web developer. My main programming language is Javascript followed by Java which I mainly use for programming challenges on codeforces.com. I use React for my websites along with Three.js, a library to create 3D animations and beautiful modern websites. My database of choice is PostgreSQL and for the backend I use Node.js and Spring Boot. I'm looking forward to learn new frameworks and get better at the ones I already know!.

Education

Universidad de Buenos Aires (2019 - Today)

Bachelor's: Computer science

Instituto La Salle (High School)

Speciality: Electromechanics

Skills

Programming/Web development

Languages

Javascript, Java
